Projects

Dream Ride | Car Rental System

[Live Link](#) | [Client GitHub](#) | [Server GitHub](#)

Full-featured web app to explore cars, check availability, and manage bookings.

Key Features:

- ◆ Users have the ability to add new vehicle listings, browse a variety of available cars, and schedule bookings with real-time date selection.
- ◆ Bookings can be easily modified or canceled by users, depending on car availability and selected timeframes.
- ◆ The application is secured with Firebase Authentication and includes JWT-protected backend routes

Technologies: React, JavaScript, Tailwind CSS, Daisy UI, Node.js, Express, MongoDB, Firebase, JWT

Find MyRoomie | Roommate Finder System

[Live Link](#) | [Client GitHub](#) | [Server GitHub](#)

A user-friendly platform built with the full stack to help users find and manage roommate listings easily.

Key Features:

- ◆ Users can create new roommate listings, as well as edit or delete their own posts as needed.
- ◆ Visitors can browse all available roommate posts, each displaying detailed information such as location, rent, preferences, and contact options.
- ◆ The application is secured with Firebase Authentication for user sign-in and sign-up

Technologies: React, JavaScript, Tailwind CSS, Daisy UI, Node.js, Express, MongoDB, Firebase
